## Introducing the New Series Paige Fairfield "Six-46"

In the New Series Paige Fairfield "Six-46," we introduce the most completely equipped motor car that can be purchased on the American market—absolutely irrespective of price.

This is a broad claim—a sweeping claim. But like every other statement made in the announcements of this company, it is the actual, literal Truth. Any comparative investigation will establish the fact convincingly.

And, when we speak of "complete equipment," please understand that we refer to every luxury and convenience that can contribute to the comfort of motoring.

The New Series Fairfield is a complete car—a finished car. From every standpoint it represents the last word in elegance and luxury.

Right now we might attempt to describe for you the many features that have been added to this greatest of all light Sixes. Even a partial list of accessories would startle the man who believes that extreme motoring comfort is necessarily a matter of prohibitive cost.

But we do not purpose to confine ourselves to descriptions, for this is one instance where mere words fail completely.

To appreciate this car you must see it, ride in it, drive it. Then, and then only, can you understand what a thoroughly great achievement it represents. Then, and then only, will you realize that \$1375 marks the utmost investment

that any one need make for the utmost in automobiling.

And please don't accept this statement lightly or too skeptically. At least do yourself justice by checking up the facts.

So let us make you a definite proposition. Go to the show room of this new car is

Then, with this car, you can drive the motor car that is the American market—and compare the two feature for feature.

See for yourself whether the Fairfield is lacking in any one detail that argues for greater efficiency, comfort or luxury. See if any car—at any price—can offer more intrinsic value than the Fairfield at \$1375.

If we have overstated our case, you will know it just the minute that you have completed such a comparison. If, on the other hand, we are right—and we sincerely believe that we are—then you will have done yourself a real service and we shall both be the gainers.

Surely no proposition could be fairer than this. Surely no intelligent man can afford to purchase any car until he has made an impartial investigation of this kind.

Will you see the new Paige Fairfield today?
